Erasmus + KA1 Student Exchange Scholarship
Cooperation Agreement with OTH University Regensburg

This letter is written to support Tran Quoc Khanh in his application for the Erasmus + KA1 Student Exchange Scholarship with OTH University Regensburg.

My name is Dr. Michel Toulouse, I am a Lecturer in computer science at HUST. Tran Quoc Khanh has been a student in my Algorithms and Data Structures class in the Autumn 2020 semester and he has been my teaching assistant in the Spring 2022 semester for the same topic Algorithms and Data Structures. For the Autumn semester 2022, he will be the teaching assistant of Jeff Edmond, a visiting professor at HUST from York University at Toronto.

I have chosen Khanh to be my teaching assistant on this topic because he was very participative as a student in this class. He used to ask questions, tentatively try to answer my questions during classes, help his colleagues during exercises and help me to find a way to interact with students who could be out of phase with the Western way of teaching. As a teaching assistant, I can see that he is very much appreciated by the students.

Khanh is a student in the data science and artificial intelligence program (DSAI) at HUST, admission requirements in this program are among the most stringent at HUST. Personality-wise, he is humble, an excellent listener, relax, open-minded on societal issues such as the environment, cultural differences, etc. In my opinion, Khanh has the academic level and the personality profile to make him an excellent candidate for this exchange program. I have no problem with strongly recommending him for this scholarship.

Sincerely,

Michel Toulouse
